15. Inclusion of Las Campanas. The 1,800 afy allocation of BDD Project capacity reserved for Las Campanas will be made a part of and incorporated in the Facility Operations and Procedures Agreement. The County may assign a portion of its BDD Project ownership to Las Campanas as part of the Facility Operations and Procedures Agreement.

1
2 **16. Cost Sharing for Design and Construction Costs for the BDD Project.** The City and
3 County agree to contribute \$30 million each to design and construct the BDD Project. The City

5 them. Funds to match budgeted expenditures shall be incorporated in the annual budget by the
6 BDD Board, and contributions to support the budget shall be incorporated in each of the parties'
7 annual budgets.
8

9 The City and the County agree to seek additional State and Federal assistance to help pay for the
10 costs of the Project. As part of the Facility Operations and Procedures Agreement, the City and
11 County intend that Las Campanas will pay for its proportionate share of that part of the system
12 allocated to its use (the diversion structure, sediment pond and related infrastructure). After
13 applying the City's and County's combined \$60 million contribution, all state and federal
14 financial assistance, the contribution of Las Campanas and any other funding, the City and

27 The costs of operating, maintaining and repairing the BDD Project that can be attributable to
28 each party's variable or proportionate share of water deliveries (such as electrical costs) shall be
29 shared according to each party's proportionate share of water deliveries.
30

31 The costs of operating, maintaining and repairing the Project that are fixed or capital costs and

Re: City of Santa Fe – Santa Fe County
Joint Powers Agreement for the Buckman Direct Diversion

Dear Mr. Jimenez,

Judy Amer of your office suggested I write and explain the references to Las Campanas in above-referenced Agreement.

The proposed Joint Powers Agreement implements a project of the City of Santa Fe and Santa Fe County to jointly construct, operate and maintain the Buckman Direct Diversion. The \$120 million project will divert water from the Rio Grande River through a diversion structure and settling facility, through pipelines to the Caja del Rio to a water treatment plant, and then to City and County residents. The water to be diverted is either native water or San Juan-Chama Project water under lease to the City of Santa Fe, Santa Fe County, and Las Campanas pursuant to State Engineer approval.

The Buckman Direct Diversion project is incredibly important to our community, and its importance is underscored by the recent drought that has plagued the area. Local groundwater resources are over committed and may not be able to meet needs on a sustainable basis. The agreement that was reached by the City and County brings Rio Grande water to our residents, and it is hoped that this will relieve the burden on local resources in times of drought. The project has obvious implications for the public health, safety and welfare. The Agreement before you represents the culmination of a 17 year effort to find a means to address our community's water needs in a holistic, sensible manner.

The project will be a government project, and will have a private partner. That private partner, Las Campanas LLC, is not a signatory to the JPA. Las Campanas is a limited liability corporation and developer of the Las Campanas subdivision on the City's west side. Las Campanas will make an investment in the facilities to be constructed and will receive water deliveries pursuant to a Facility Operations and Procedures Agreement that is being developed. The parties have already developed principles to guide the drafting of the agreement, and the agreement is expected to be completed soon. Las Campanas will construct, at its own expense, a pipeline to transport raw water to its facilities, and will be responsible for any necessary treatment.

The JPA fundamentally establishes the BDD Board to oversee the construction and implementation of the Buckman Direct Diversion in accordance with § 11-1-1 NMSA, the Joint Powers Act. It is essential to the local governmental entities that a JPA-created Board oversee the crucial work of constructing this water resource facility. The federal government, on whose property the proposed diversion structure will be placed, will only issue a single permit for river diversions. That means that if the City and County did not partner to some extent with Las Campanas, the entire project could be put in jeopardy if multiple applications for diversion structures were filed. That partnership will be represented in the Facility Operations and Procedures Agreement. In conclusion, the JPA is an essential step in providing a governance structure for the local government entities and the operating agreement to follow will detail the expenditures and water deliveries to the private partner.

I hope this is helpful in your review of the Agreement. If you have any questions, please call Stephen Ross, County Attorney, at 986-6279 or Kyle Harwood, Assistant City Attorney at 955-6502.

Sincerely,
